---

Gary,

Good afternoon, on FT1004 we need to decide are we shipping the oil to Ash Grove and sending the water to Veolia to be burned or are we going to separate the oil and water and resample the water to see if we can drop the D032 which would allow Lonestar to handle the material. Secondly, on FT506 are we using generator knowledge to get rid of the pesticide codes and send this to San Leon as fuel? Or possibly leaving it as is and sending to Deer Park for fuel at .45/lb. Clean Harbors also priced a .11/lb rate for fuel into Deer Park if we could ship in a vac truck. I don't see this as a viable option the solids content is way too high. Let me know if we need to discuss further.

Thanks,

**Beth Crawford**
